

PLEASE READ TEXT FIRST!!

After years of research, scientists have discovered that women do not like the standard mouse given away with PC's. They found that there is not a physical reason for their aversion; it is more of a psychological problem. Some women reported that the mouse 'just didn't feel right' in their hands. Based on the research, a new mouse has been designed especially for women. Various field tests have been carried out on the new design, here are some of the testimonials:

Julie from Hawthorn: "It feels so much better. More comfortable, more like how it's supposed to be".

Susan from Kew added: "I think mice were originally designed just for men, but this new type is definitely made for women. It fits right in with my lifestyle".

Hillary from South Yarra: "I took to it like a duck to water, every woman should have one!!"
