

## Tech Support for Printer Problem

### MUST READ BEFORE LOOKING AT THE ATTACHMENT!!

A co-worker got a biro stuck inside our printer.

He started to try and remove the biro, but I told him we don't have time for that now, just put a note on the printer telling folks not to use it and then report it to the Help Desk.

So he grabbed a piece of paper and scrawled on it.

I left before he finished the note.

About 20 minutes later, one of my techs comes in laughing and says he was just in the lobby, saw a piece of paper on a printer and went to investigate.

Attached is what he found. Sometimes things don't always come out the way you intend.
